2014,

MHPE got The Distinctive Quality Feature for Internationalisation

NVAO, The Accreditation Organisation of the Netherlands and Flanders awarded SHE's MHPE programme with

The Distinctive Quality Feature for Internationalisation

It used the criteria and standards of the NVAO framework for the Assessment of Internationalisation.

From the panel report, according to the committee:

“The Master of health professions vision on internationalisation is exemplary, explicit and comprehensive. This vision focusses on the development of an international community of health professions' educators who have gained, in an international context, the knowledge and skills to educate and train competent health professionals. It also acknowledges the fact that the programme is held in high esteem internationally. The international character of the programme is reflected in several international and intercultural intended learning outcomes relating to multi professional and multicultural skills, attitudes and knowledge. Based on its findings the committee assesses the internationalisation of the MHPE programme as good”.
